

Chapter 3.

Summary Level Sequence Chart

Summary levels specify the content and hierarchical relationships of the geographic elements that are required to tabulate and summarize data. In the Summary Level Sequence Chart that follows, the summary level code precedes the summary level area, and symbols are used with special meaning for summary levels:

Hyphen “-” separates the elements of a hierarchy.

Slash “/” denotes equivalent elements that have different names.

Parentheses “()” are not used in the specification for summary levels but are used occasionally in the usual and customary manner in statements of clarification.

Note: For the 2008 Redistricting Data Prototype Summary File, the state summary level contains only the San Joaquin County, California, site. In addition, some summary levels on this chart are not present in the Prototype Summary File product due to the restricted territory of the San Joaquin County site. Summary levels not present in this product are marked with an asterisk () after the summary level code.*
